CSI3007 - Advanced Python Programming

Lab Project Review - 1

NAME : RAJAVELMURUGAN S

REG_NO : 23MID0018

FACULTY : SHARMILA BANU K

LAB SLOT : L31+L32+L49+L50

Title:

Diagnostic Laboratory Processing Portal

About the website:

It is used by laboratory staff to receive test requests from the hospital through Dropbox, validate the patient and test information, process the requested tests, enter the test results, and send the completed results back to the hospital through Dropbox

Frondend:

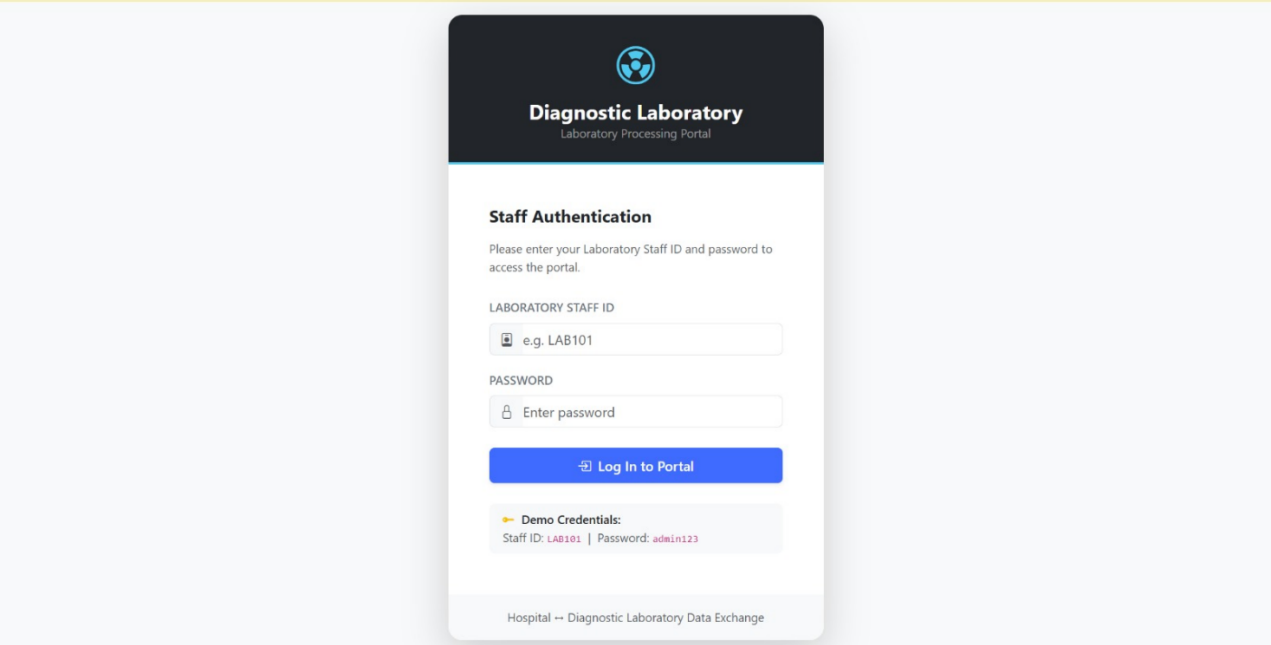

Figure 1 : Login page of the Diagnostic Laboratory Processing Portal

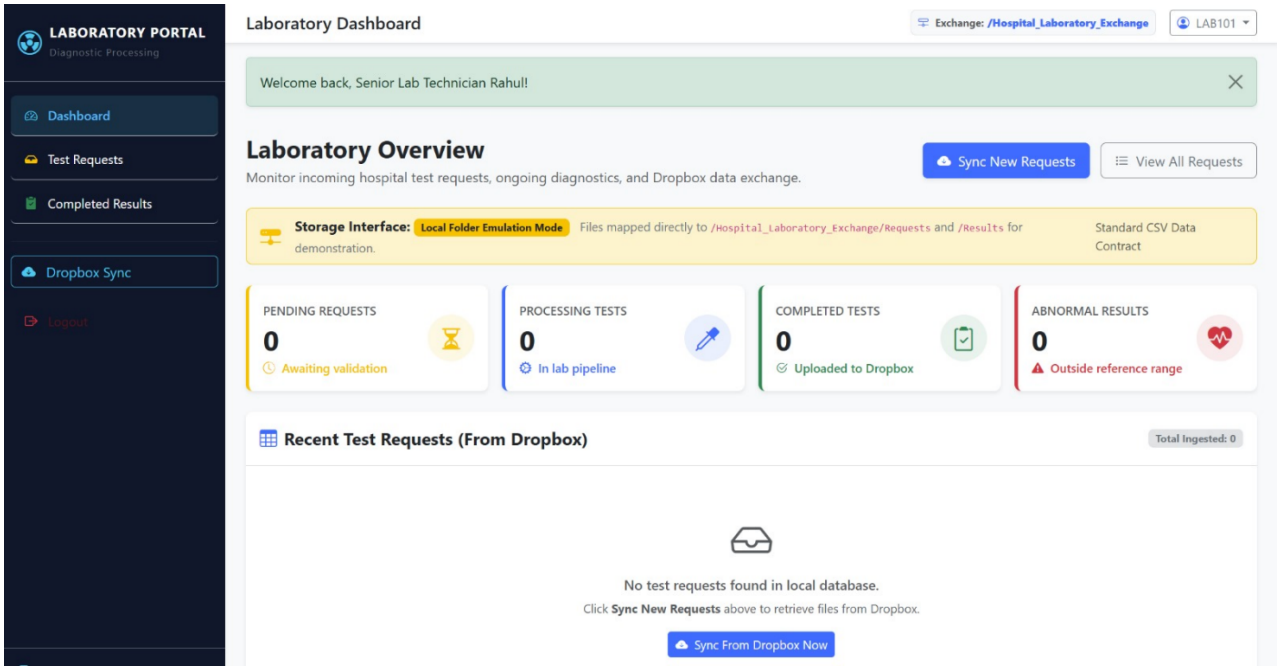

Figure 2: Laboratory dashboard showing test requests and test status.

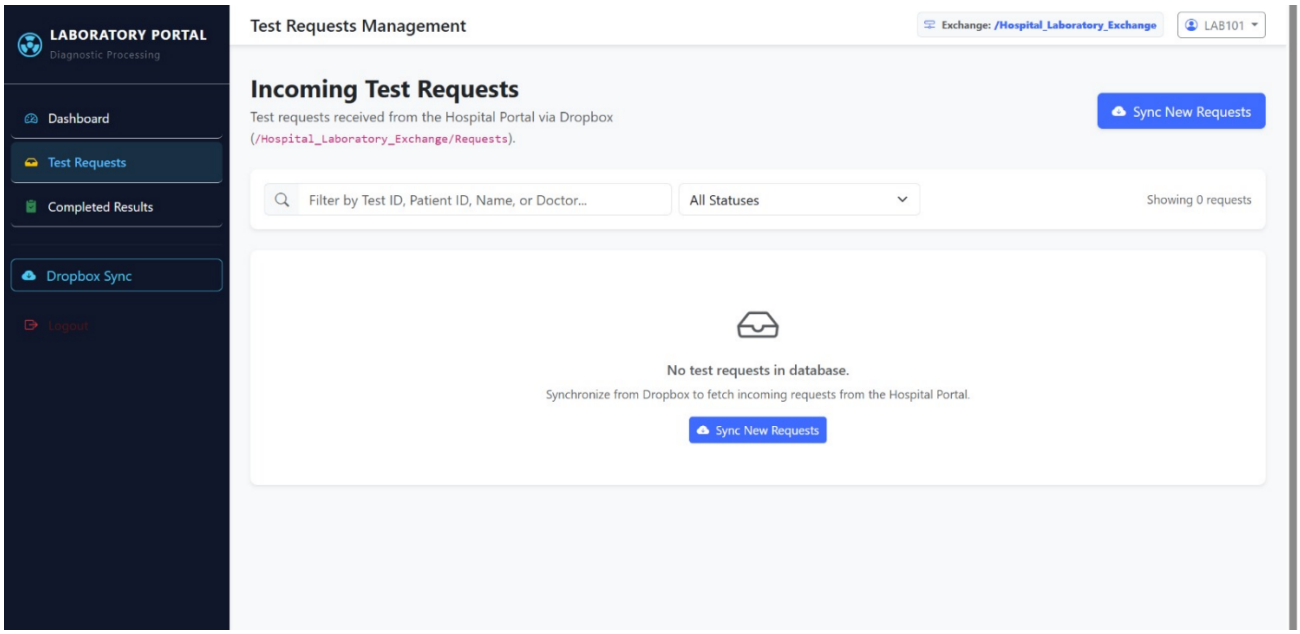

Figure 3: Test Requests page showing incoming hospital test requests.

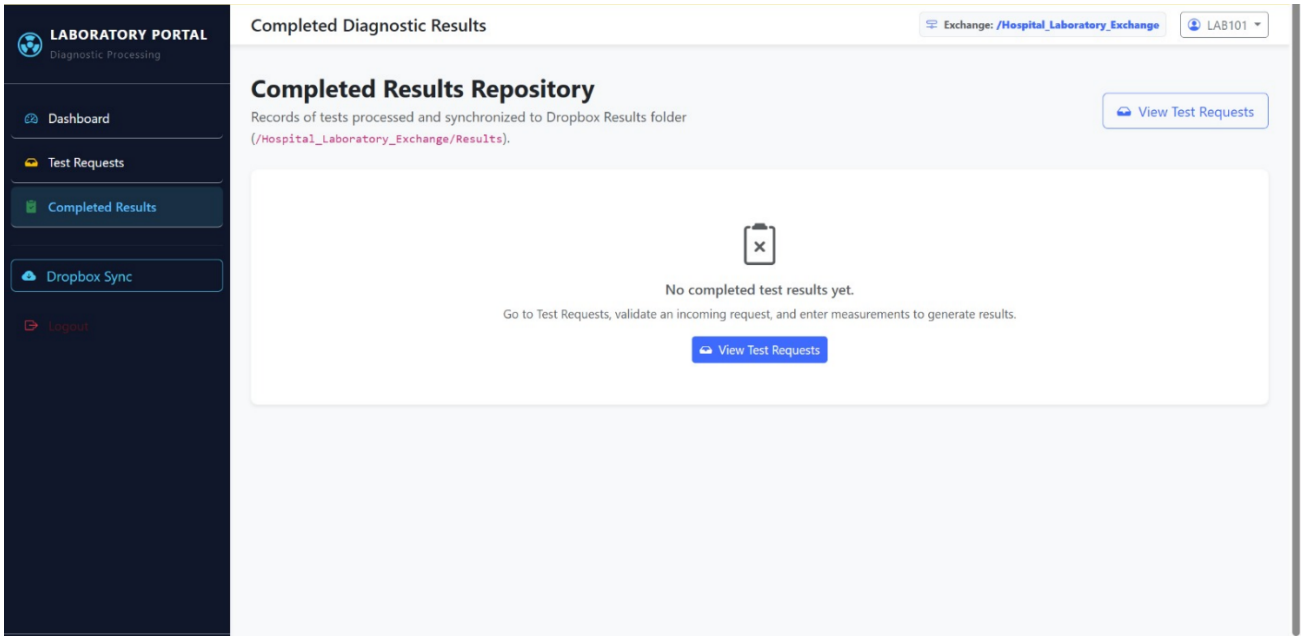

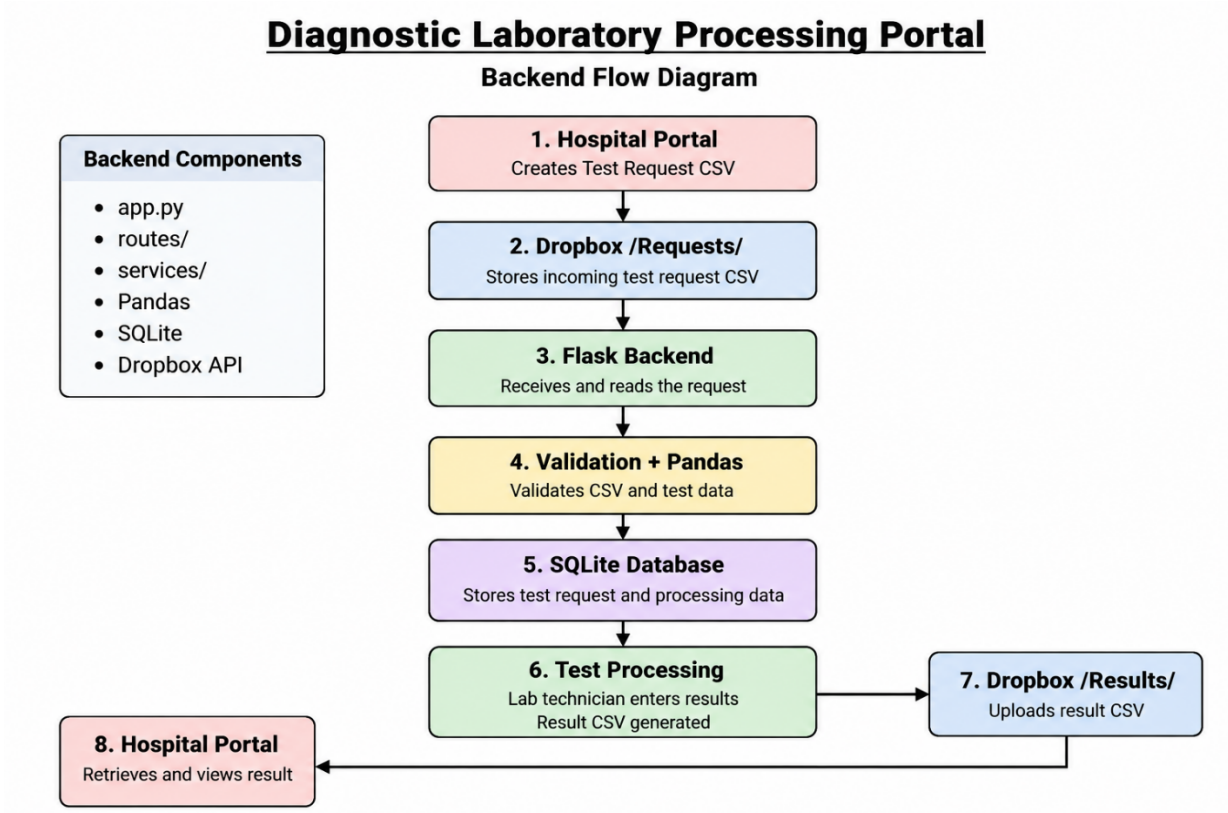

Figure 4 : Completed Results page showing processed laboratory test results.

Backend architecture:

Hosting:

The Diagnostic Laboratory Processing Portal will be hosted on Render. The Flask application will be deployed as a web service for online access. A public URL will allow users to access the portal through a web browser.
